PROJECTS

Virtual Assistance For The Blind (Python)

Virtual Assistance for the blind is a Voice-based Email System that will make the email system very easily accessible to visually challenged people and also help society.

College Enquiry Chatbot (Python)

The College Enquiry Chatbot project is built using machine learning algorithms that analyze user's queries and understand the user's message. This System is a web application that provides answers to the query.

Online Voting System (PHP)

"ONLINE VOTING SYSTEM" is an online voting technique. In this system, authorized voters can give his/her vote online without going to any physical polling station. There is a database which is maintained in which all the names of voters with complete information is stored.

Electrical Stock Management System (Java)

The project aims to manage stocks for an electrical company or organization, and take care of sales and purchases of electrical products.
